PLEASE READ

DO NOT GIVE BLOOD IF:

- you have been diagnosed with COVID-19 UNTIL 28 days after your recovery (no fever, cough or other respiratory symptoms and no need for oxygen);
- you are waiting for a test result for COVID-19. If it is negative and you are well you may donate. If it is positive you must wait 28 days from your testing date and be well;
- in the last 14 days you have been within six feet of someone who has the virus or is being tested for the virus for greater than 15 minutes without use of personal protective equipment;
- you have fever, cough, or shortness of breath.

Call 800-747-5401 or text 999-777 and we will determine when you will be eligible to give blood.

Visit www.bloodcenter.org for more information.
