ATTENTION RECOVERED COVID-19 PATIENTS

BE A CONVALESCENT PLASMA DONOR

Patients who have recovered from COVID-19 can help give others a fighting chance by donating Convalescent Plasma. These antibody-rich blood products can give people hope and make a difference.

POTENTIAL VOLUNTEER DONORS MUST:

- HAVE HAD AN INITIAL POSITIVE MOLECULAR TEST RESULT for SARS-CoV-2 virus. Also called PCR, this test is a requirement for self-referrals and care provider referrals.
- BE RECOVERED FOR 28 DAYS
  If a follow up SARS-CoV-2 test with a negative result has been performed by care provider, then at least 14 days.
- BE 17 YEARS OLD
  and meet all other health requirements to donate. Details at www.bloodcenter.org.

If you meet the above criteria, please fill out the appropriate form (self-referral or care provider) found at www.bloodcenter.org and our Patient Services team will follow up with you.

“Plasma is used routinely in transfusion, where it has an excellent safety profile that we expect to be maintained with this product. We are hopeful.” - Dr. Louis Katz, Chief Medical Officer (MVRBC)
