

FIGHTING BACK AGAINST COVID-19

Everyone (especially 65+ years old or in a high-risk group):

Get a COVID-19 vaccine as soon as you qualify

Sick, pre-hospital:

You may qualify for highly effective monoclonal antibody treatment – ask your doctor or go to a designated infusion center

Hospitalized, within first 72 hours:

Seek convalescent plasma therapy and Remdesivir

Hospitalized, no improvement:

Dexamethasone recommended for serious illness

Recovered from COVID-19 for 14 days:

Donate plasma to help others at bloodcenter.org

ADDITIONAL STEPS YOU CAN TAKE:

- Wear a mask and practice social distancing to protect yourself and others
- Opt in for exposure notifications and outreach; participate in contact tracing
- Get tested if you've been exposed or have symptoms
- Consider participating in clinical trials
