

From: _____ **To:** _____

Instructions:

Transferring hospital: Document sending and receiving hospitals. Enter unit #, product code, blood type and expiration date in spaces provided. In designated area document staff inspecting and packing product, date and time product was packed. Send this form with product to receiving hospital.

Receiving hospital: fill in receiving hospital section below and fax this completed form to MVRBC IMD.

Unit # (include check digit)	Product code	ABO & Rh	Expiration Date

Comments:

The blood component container has a tamper-proof seal when originally issued and this seal remains unbroken. An original segment is properly attached and has not been removed. A minimum of two (2) segments is required for return of LRBCs to the blood center. Products have been stored continuously within the temperature range indicated on the component label.
